

SAHIL AUKHAJ

Software Engineering Student | Full-Stack, Mobile & IoT Developer

Mauritius | +230 5756 6961 | sahilaukhaj666@gmail.com | Portfolio: sahilaukhaj.github.io | github.com/SahilAukhaj

SUMMARY

Third-year Software Engineering student at the University of Technology, Mauritius, with internship experience shipping features for a Next.js/TypeScript healthcare platform. Builds end-to-end projects across web, mobile, IoT, machine learning and games. Seeking software engineering internship and junior developer roles.

EDUCATION

University of Technology, Mauritius (UTM)

2024 – Present

BSc (Hons) Software Engineering · Currently Year 3, Semester 1

Mauritius

- **Coursework:** OOP, Database Systems, Operating Systems, Web Services, Mobile Application Development, AI & Machine Learning, IoT, Software Security, Agile Methods, Game Development.
- **Final Year Project (in progress):** Smart Pharmacy Management and Prescription Validation System – OCR prescription checks and drug-interaction warnings (PHP, MySQL, Tesseract OCR).

EXPERIENCE

Software Engineering Intern – Cybernex Solutions Ltd

Feb 2026 – May 2026

Industrial placement · MoriHealth doctor-patient web platform

Mauritius

- Delivered doctor-portal and guest-site features in a multi-developer team using Next.js 15, React 19, TypeScript and Tailwind CSS, contributing 15 commits via Git/GitHub.
- Built the Doctor Dashboard, sidebar, Schedule and Appointments pages with stat cards, Recharts trend charts, Radix UI dialogs and toast notifications, prototyped first in Figma.
- Rebuilt guest pages (home, doctor finder with search and filters, FAQ, contact) with Framer Motion, Embla carousels and a responsive navbar/footer; fixed ESLint and production build errors.

Storekeeper – Hyperpharm Ltd

Nov 2023 – Apr 2024

- Operated the inventory management system to generate supply tickets and track product data; verified stock counts and resolved discrepancies with close attention to data accuracy.

PROJECTS

Smart Pill Container – IoT Medication Dispenser | ESP32, C++ (Arduino), Flutter, Firebase

- Programmed ESP32 firmware that raises the scheduled compartment with servos, alerts with LEDs and a buzzer, detects intake with reed switches and auto-lowers on a missed dose.
- Built a Flutter caregiver app synced through Firebase Realtime Database for schedules, live device status and adherence history (taken vs. missed).

ProjectPulse – Agile Project Management REST API | C#, ASP.NET Core 8, EF Core, SQL Server, React

- Implemented user-story CRUD endpoints with bearer-token authentication, JSON file upload and Swagger docs; integrated the Jira REST API and built console and React clients.

Mauritius Treasure Hunt – Progressive Web App | PHP, MySQL, JavaScript, Firebase Auth, Leaflet

- Built an installable, offline-capable PWA where players scan QR codes at real locations and track progress on a map, backed by a modular PHP/MySQL API with an admin panel and Google sign-in.

Tank Hero & Samurai Honor – 2D Games | Construct 3, JavaScript, WebRTC, AdMob

- Tank Hero: turn-based artillery game with projectile physics, AI opponent, six levels and online two-player mode over WebRTC, exported for web and Android.
- Samurai Honor (team of 3): 12-level pixel-art platformer with boss fights, an upgrade shop and AdMob ads.

Machine Learning – Regression & Classification | Python, pandas, scikit-learn

- Raised test R-squared from 0.13 to 0.64 predicting delivery time on 45,593 orders (degree-3 polynomial regression); classified smoking status on 44,552 records with a neural network at 75.9% accuracy vs. a 63.3% baseline.

Other projects

github.com/SahilAukhaj

- Tank Game 2D and Roulette simulation (Java, Swing) · CookEase voice-controlled cooking PWA (JavaScript, Web Speech API, PHP) · Early Pest Detection (Python, OpenCV, Flask, Scrum team).

TECHNICAL SKILLS

Languages: Java, C#, TypeScript, JavaScript, Python, PHP, SQL, PL/SQL, Dart, C++, HTML, CSS

Frameworks: Next.js, React, Tailwind CSS, ASP.NET Core, Entity Framework Core, .NET MAUI, Flutter, scikit-learn, OpenCV

Data & Cloud: MySQL, SQL Server, Oracle Database & Forms, Firebase, Netlify, GitHub Pages

Tools: Git, Visual Studio, VS Code, IntelliJ IDEA, Android Studio, Arduino IDE, Construct 3, Figma, Swagger, Jira, StarUML, Oracle Data Modeler, Wireshark, Cisco Packet Tracer

Practices: OOP, REST APIs, Agile/Scrum, UML & ER modelling, responsive UI, PWAs
